

David K. Hill

Senior BMC ITSM Application/Systems Developer/Engineer/Architect

Centennial, Colorado

Phone: 916-214-0388 Cell

Email: dkhill@fwcc4u.com

AVAILABILITY

I prefer full time or contract work in the greater Denver Tech Center (DTC) Area of Colorado or via remote work (Telework).

OBJECTIVE

I am currently seeking a position with a dynamic, innovative, and fast paced company that will utilize my proven technical skills to allow me to make a difference in their overall public or military image. I am always eager to assist and make the team grow in knowledge and understanding. I have extensive skills with both out of the box applications as well as customized Remedy AR System applications including the full ITSM Suite. I base my driven disciplines on making the System work for the people with goals to streamline processes and business strategies. I pride myself on attention to detail and have a tremendous rapport of technical knowledge dealing with system and application architecture relating to BMC Remedy/Helix AR System and ITSM Architecture. I have several major successes under my belt for National and Global deployments projects. I have extensive experience with TrueSight Server Automation (TSSA), including hands-on work with the TSSA Console and TSSA Client. My expertise encompasses deployment, configuration, troubleshooting, and operations of these tools. I have successfully managed and optimized server automation processes, ensuring efficient and reliable performance. I am also continuing to seek to broaden my knowledge with the similar cloud only based Service Now platform. (Kubernetes, Docker Container technologies). With my many years of the BMC product suites. I'm also willing to expand my horizons with containerization technologies (Docker, Kubernetes, Rancher etc).

COMPETENCIES AND ETHICS

I have 35+ years of experience working with BMC Remedy Based Applications, Infrastructure and Platforms including Atrium CMDB, TrueSight Server Automation and BMC Client Management.

I have an extensive understanding in system architecture, network topology and performance base operations (DevOps). I continue to mentor and assist team members at all levels of the application infrastructure. I am very logically minded when performing disciplined troubleshooting tasks.

- Experience in BMC Applications and Server Suites, Remedy/ITSM, BMC TrueSight Server Automation
- Worked with versions Remedy Corporation 1.0 to BMC Helix 23.0
- BMC Rest API Integration between homogeneous systems (Service Now, Remedy Systems, etc.). Integration includes developing endpoints between BMC Helix System and BMC AR System via Jetty and Filter API paradigms. Developed Rest API testing scripts to evaluate and troubleshoot Rest API connectivity and end point security issues.
- Application development life cycle for single page application web sites using VueJS/NodeJS and Kinetic Data/Task Integration.

- Extensive experience with the BMC Smart Reporting architecture and administration.
- BMC Analytics for BSM - Report Development / Best Practices / Performance and Tuning. SAP Business Objects implementation as well as Remedy Smart Reporting web application.
- Strong problem-solving skills, including the ability to review performance issues, identify root cause, present, recommend and develop solution(s).
- Digital Workplace administration and service catalog form deployment. Includes administering and maintaining the underlying Tomcat services.
- Applications and Products - Versions 1.0 through 20.02. Helix 23.00
- Custom Applications on Core AR System - Version 1.6 Through 9.1.04
- Application design, development, deployment and system architecture, 3rd Party Integrations to BMC and AR System product lines using Atrium Integration Engine which is now Kettle Server integration and Extract Transform Load (ETL) operations
- BMC TrueSight Server Automation (BladeLogic), agent and software/OS patching and update
 - Utilizing multiple software deployment and patching repositories including Ivanti via back-end scripts with PowerShell and Bash scripts
 - Building Templates for TSSA Client
- BMC Client Management

Detailed Product Specific Competencies

The following is a list of BMC Products that were used to specify, install, build, design, implement and deploy applications at the various installations. Competency details available on request.

- BMC Remedy AR System core customized development and design
- Develop and Design JavaScript based applets and components for use within web-based appliances of Mid-Tier and AR System Components
- BMC TrueSight Server Automation (20.02)
 - Installation and configuration of application, console, file, and repository servers
 - Air-gap offline update system download and deployment
- BMC Client Management – Update Deployment of Windows OS Systems to all Client Devices
- BMC Remedy Suite Product (ITSM)
 - Knowledge Management
 - Change Management
 - Incident Management
 - Problem Management
 - Service Request Management
 - Service Level Management (SLM)
 - Atrium CMDB
 - Digital Workspace (DWP)
 - Data Management Foundation (ETL operations)
 - Customized components utilizing the Remedy Overlay management system
 - Back-end server processes and integrations
- Security Technical Implementation Guides (STIG) – Review of hardening of systems and vulnerabilities correction
- Web Application – SPA Administration / Development (VueJS Framework based on NodeJS)
- Microsoft SQL Server 2016 – Database Administration, Integration, Data Analysis, Schema and SQL Procedure/Job Development
- Ivanti Software Discovery, Deployment and Patching with Integration with BMC Remedy ITSM and SolarWinds
- REST API and Web Services Integration End Points (ExpressJS and NodeJS)
- Microsoft Identity Management 2016
 - Password Management

- Privileged Access

Employment History

United States Coast Guard via Peraton, Inc

Senior Remedy Application Engineer/Developer

08/19/2024 – 04/25/2025

Manager: Jay Tidwell – Jay.Tidwell@peraton.com

- Developed and supported USCG On-Prem Ticketing system; facilitated migration to BMC Helix SaaS
 - Edited Service Request Definitions for Digital Workplace deployment
 - Supported BMC AR System 20.02 and ITSM 20.02 (Change/Incident/Work Order)
 - Migrated Smart Reporting to Helix Dashboards
 - Converted SharePoint Knowledge Articles to Helix KCS
 - Assisted with licensing bundle access and user account processes
-

United States Navy via Nationwide IT Services, Inc

Senior Remedy Application Engineer/Developer

03/24/2022 – 06/15/2024

Manager: Teresa Fannin – teresasfannin@aol.com

- Developed REST API endpoints for Navy Shared Data Environment (SDE)
 - Supported Navy311 SPA and NEITSM platforms
 - Administered Digital Workplace (DWP) and SSL endpoint communications
 - Assisted New Orleans Naval Base telephony team with network troubleshooting and certificate management
-

United States Space Force via Prime Technical Services Inc

Senior Remedy/TSSA/BCM Engineer

05/22/2020 – 02/21/2022

Manager: Cynthia Julien

- Architected and deployed ITSM and TSSA systems across 181 Air Force sites
 - Developed Ivanti-based patching scripts (PowerShell, CMD, Bash)
 - Built CMDB foundation and air-gap patch/update catalogs
 - Configured LDAP/AD authentication and PKI for Remedy SSO
 - Installed Microsoft Identity Manager for password and account automation
-

Defense Information Systems Agency (DISA) via DM Inc

Senior Remedy ITSM / SAP Engineer

05/30/2017 – 05/22/2020

Manager: David Fincher – Greenwood Village, CO

- Administered Solaris-based ITSM systems and Smart Reporting

- Developed PL/SQL scripts and BIRT reports
 - Integrated secure JDBC connectivity (TLS 1.2+) for Yellowfin Smart Reporting
 - Led reverse-engineering of undocumented JDBC SSL behaviors
 - Built VMWare-based development systems
-

US Army via SRA International / CSRA / GDIT

Senior Remedy ITSM SAP Engineer

05/11/2015 – 05/25/2017

Location: Fort Huachuca, Arizona

- Supported ARCYBERCOM ITSM workflows and incident management
 - Developed BIRT reports and dashboards
 - Built virtual machines for deployable development systems
-

Verizon Enterprise via Infinite Computer Solutions

Senior Remedy Application Engineer

02/24/2014 – 12/31/2014

Location: Colorado Springs, CO

Sponsor: David J. Nauer – David.Nauer@verizon.com

- Designed global ticketing systems for security incident management
 - Architected web service integrations across international banking sites
 - Supported Java, Linux OS, Oracle DBA, and Apache Tomcat environments
-

Comcast Cable Corporation

Senior Remedy Application Engineer

06/22/2009 – 01/16/2014

Location: Englewood, CO

Manager: John Murphree – John_Murphree@cable.comcast.com

- Developed Executive Support Line for 3.3M customers

Certifications

- **AR System Administration Certification (RAC)** – Version 7.5, July 2010
 - **CompTIA Security+** – Certification SY0-401, December 21, 2022 (CEC Ongoing)
-

Security Clearance Level

- **Active Top Secret TSI** – Granted 04/02/2018
 - **Prior Grant** – 1983 (USAF)
 - Department of Defense: US Army, DISA, Air Force
-

Industries

- Department of Defense – US Air Force, Army, Navy, Coast Guard, Space Force, DISA
 - Telecommunications – Cable, Wireless Cells, Home-Based Security Systems, Telephone and Internet
 - Department of Interior – DOI, BLM, DFG, BIA
 - Semiconductor Manufacturing
-

Education & Training

- **Applied Science Degree in Computer Science and Electrical Engineering**
- **Post Graduate Courses of Study**
- **Department of Defense Training:**
 - Anti-Terrorism Level I
 - DoD Threat Awareness
 - Classified Systems Handling
