AVAILABILITY

Open to full-time or contract roles in the Denver Tech Center or remote.

PROFESSIONAL SUMMARY

Senior ITSM engineer and application architect with a strong record supporting large-scale enterprise and DoD environments. Known for delivering stable, secure, and high-performance Remedy/Helix platforms, building clean integrations, and improving operational workflows across complex infrastructures.

Experienced in BMC Remedy/Helix, TrueSight Server Automation, CMDB, Smart Reporting, and multi-platform integrations. Adept at modernizing legacy systems, optimizing performance, and guiding teams through migrations, upgrades, and cloud transitions. Collaborative, detail-driven, and committed to building systems that work for the people who rely on them.

CORE STRENGTHS

- Remedy/Helix Architecture, Development & Administration
 - BMC TrueSight Server Automation (TSSA)
 - REST API & Web Services Integrations
 - Digital Workplace (DWP) & Service Catalog
 - CMDB Design & Data Management
 - Smart Reporting / Helix Dashboards
 - Secure Infrastructure, PKI, LDAP/AD, STIG Hardening
 - SQL Server, Oracle, PL/SQL, ETL (Kettle)
 - VueJS/NodeJS SPA Development
 - DevOps-aligned troubleshooting & performance optimization
-

TECHNICAL HIGHLIGHTS

- Extensive experience across Remedy/Helix versions from early AR System releases through Helix 23.x
- Designed and deployed enterprise-scale ITSM, CMDB, and automation platforms across global and DoD environments
- Built secure REST API integrations between Remedy/Helix, ServiceNow, and custom systems
- Developed automation workflows, patching pipelines, and air-gap update catalogs using TSSA, Ivanti, PowerShell, Bash, and CMD
- Migrated Smart Reporting to Helix Dashboards and modernized reporting architectures

- Administered Digital Workplace, Tomcat services, SSL endpoints, and authentication frameworks
 - Delivered custom applications, overlays, and integrations using AR System, JavaScript, and ETL tools
-

PROFESSIONAL EXPERIENCE

United States Coast Guard (via Peraton)

Senior Remedy/Helix Application Engineer

08/19/2024 – 04/25/2025

- Supported on-prem Remedy system and assisted migration to BMC Helix SaaS
 - Updated Digital Workplace service catalog and SRDs
 - Migrated Smart Reporting to Helix Dashboards
 - Converted SharePoint knowledge content to Helix KCS
 - Supported licensing, access, and user provisioning workflows
-

United States Navy (via Nationwide IT Services)

Senior Helix Integration Developer

03/24/2022 – 06/15/2024

- Built REST API endpoints for Navy Shared Data Environment (SDE)
 - Supported Navy311 SPA and NEITSM platforms
 - Administered DWP, SSL communications, and endpoint security
 - Assisted telephony/network teams with certificate and connectivity troubleshooting
-

United States Space Force (via Prime Technical Services)

Senior Remedy/TSSA/BCM Engineer

05/22/2020 – 02/21/2022

- Designed and deployed ITSM and TSSA across 181 Air Force sites
 - Developed Ivanti-based patching and automation scripts
 - Built CMDB foundation and air-gap update catalogs
 - Configured LDAP/AD, PKI, and Remedy SSO
 - Installed Microsoft Identity Manager for account automation
-

Defense Information Systems Agency (DISA) (via DM Inc)

Senior Remedy ITSM / SAP Engineer

05/30/2017 – 05/22/2020

- Administered Solaris-based ITSM and Smart Reporting
 - Developed PL/SQL scripts and BIRT reports
 - Implemented secure JDBC/TLS connectivity for Yellowfin
 - Reverse-engineered undocumented SSL behaviors to stabilize reporting
 - Built VMware-based development environments
-

US Army (via SRA / CSRA / GDIT)

Senior Remedy ITSM Engineer

05/11/2015 – 05/25/2017

- Supported ARCYBERCOM ITSM workflows and reporting
- Developed BIRT dashboards and analytics
- Built deployable virtualized development systems

Verizon Enterprise (via Infinite Computer Solutions)

Senior Remedy Application Engineer

02/24/2014 – 12/31/2014

- Designed global ticketing systems for security incident management
- Built web service integrations for international banking sites
- Supported Java, Linux, Oracle, and Tomcat environments

Comcast

Senior Remedy Application Engineer

06/22/2009 – 01/16/2014

- Developed Executive Support Line platform serving 3.3M customers

CERTIFICATIONS

- AR System Administration Certification (RAC)
- CompTIA Security+ (Active CEC)

SECURITY CLEARANCE

- **Active Top Secret (TS)**
- Prior DoD/USAF clearance history

INDUSTRY EXPERIENCE

DoD (Army, Navy, Air Force, Space Force, Coast Guard, DISA)

Telecommunications

Department of Interior

Semiconductor Manufacturing

EDUCATION

Applied Science Degree – Computer Science & Electrical Engineering

Additional DoD training in security, threat awareness, and classified systems handling
